

Technical Bulletin # 4

01/06/11

Subject: Change of balance gear version 3.

To smooth the vibration in the BMB HAT engine further, BMB are to introduce a different balance gear with immediate effect. The new balance gear does not affect the engine performance.

Current balance gear

New Balance gear

The new balance gear weighs 290 grams + or – 10 grams.

The new balance gear is available under warranty on an exchange basis. Owners can either return their engine to Kart Grand Prix UK to have the gear exchanged and fitted free of charge or they can return their engine to their engine builder where the engine was purchased where the gear will be exchanged and fitted free of charge .

All engines must have the new balance gear fitted by June 10th which will then be the only balance gear compliant with the official BMB HAT engine fiche.
